<https://www.brettbrooner.com/#home>

Include:

Image, Video, Text, Sound.

Site Concept:

This website will be a space for me to display my work, projects, and portfolio. This page is intended to be seen by potential clients, other creatives, and anyone looking to see my work. Because of this, I want this website to be the perfect combination of readability and creativity. I want to display my creativity while also allowing the website to maintain its simplicity. With my work being the primary focus of the website, much of the design will actually be around the photos and other content. I envision designs in photoshop serving as background images and assets.

Website Background Mockups:
